

REPRESENTATIVE DRIEHAUS WELCOMES NEARLY \$9.4 MILLION IN ADDITIONAL RECOVERY FUNDING FOR GREATER CINCINNATI

Recovery Funding Will Support Army Corps of Engineers Project at Duck Creek

WASHINGTON, DC—Representative Steve Driehaus today welcomed an announcement by the United States Army Corps of Engineers of \$9,384,000 in American Recovery and Reinvestment Act (ARRA) funding for greater Cincinnati. The award will support the final phase of the Duck Creek, Ohio Local Flood Protection Project.

“This is great news for Cincinnati and yet another indication that the recovery legislation is delivering resources where they’re needed most. This investment will not only create and protect jobs in the area, but it will support a project critically important for flood control along Duck Creek,” said Rep. Driehaus.

According to the Army Corps of Engineers, the award of ARRA funding will allow the Corps to award a fully funded contract for construction of the final phase of the project, including the associated design and construction administration cost.

More information on Army Corps of Engineers civil works projects benefiting from ARRA funding can be found [here](#).
